**Subject:** RE: List of Drinking Water Systems where PFAS and GenX have been detected /meeting of two agencies

Hi Doug/Dan

I am working on putting together a PFC occurrence presentation for the next Drinking Water Quality Council Meeting (DWQC) that is scheduled for Feb 26. We are still getting data from monitoring efforts that I am building into that presentation. When I get done with these I will forward. Also, something I think you may already know but in case not, there was monitoring done by the County Health Department and the Village of Hoosick for Gen X and that showed non-detect levels. We did more extensive Gen X sampling at Hoosick and are looking to get those results soon. Doug Garbarini has been following that sampling.

As far as an in-person meeting March 7 is tough for I think I am in Syracuse the night before at a public forum on HABs. It does work otherwise so lets not take it off the table. I will throw out March 1 and 8 as other possibilities, with the first better than the 8<sup>th</sup>. The public forum I am talking about is one of four forums across the state that includes bringing in outside experts. These forums were in the Governors State of the State Address and are planned between Feb 27 and March 26. Add in the DWQC meeting the last week of February and the ASDWA member meeting March 11-March 16, there is not a lot of work days left so that is why I am saying leave March 7 on the table.

As far as the DWQC we have had two meetings, and we hope to have two more before the beginning of summer with the result from those two meetings being a recommendation for 1,4-dioxane, PFOA and PFOS MCLs from the council. The last drinking water council focused on the process of health risk characterization and decision points in those assessments. This was done to help inform the council for their deliberations. One of those two meetings is the one at the end of Feb. It also looks like the Feb meeting will be on the 26<sup>th</sup> in our NYC office.

Hi Lloyd,

Hope it's all good on your end? Have you had a chance to pull together any information on PFAS/Gen X in NYS drinking water? Also, do you have any updates on the NYS Water Quality Rapid Response Team (WQRRT) and work to date?

Tx-Doug

**Subject:** List of Drinking Water Systems where PFAS and GenX have been detected

Hi Loyd,

We're working with our HQ to develop a list of all drinking water systems where any PFAS and/or GenX have been detected. Do you have a list for NY, and if so, can you send it to us by COB Friday? This is part of the larger conversation on regulating PFAS and/or GenX. We have the UCMR3 data, but are interested in any additional information you may have. Please let me know if you have any questions and/or wish to discuss further. Thanks in advance for your help.

Tx-Doug
